

Buying safer disinfectants for household use

This chart lists safer disinfectants that have been approved by the Environmental Protection Agency for use against coronavirus.

- None of these disinfectants have bleach or quaternary ammonium compounds.
- The chart shows some stores and websites where you can buy these disinfectants.

This Toxics Use Reduction Institute and SF Approved have longer lists that include all of the disinfectants on this chart, plus additional products that are more likely to be purchased by businesses and institutional buyers. These lists are at:

- <https://www.sfapproved.org/safer-disinfectants-covid-19>
- https://www.turi.org/Our_Work/Cleaning_Laboratory/COVID-19_Safely_Clean_Disinfect/Safer_Disinfecting_Products/List_of_Safer_Disinfecting_Products

Things change over time, so please let us know if a store stops selling a product or if you have any corrections or updates by sending a note using the form at:
